

Why should I join a neighborhood jichikai?

Husband and wife joining the community together!

“We are the *hancho* (neighborhood leader) for this year. Through the activities of the neighborhood jichikai, we have met and connected with local people. Considering the time when a disaster occurs, I think that community ties are important. Since we both work, we take turns attending meetings with my husband. Since my husband doesn't usually get involved in the community, I think this is a good opportunity for him to get involved in the area.”
(Ms S, a female in her 40s living in Minuma Ward)

Nothing is more important than making the local people happy!

“My parents participate in the neighborhood jichikai activities and I join the local youth association and plan and manage the summer festival in cooperation with the jichikai's association. It can be difficult at times, but I'm happy and it's rewarding when the people who come to the festival enjoy it. It's easy to avoid community activities, but when you try it, it's actually a lot of fun! No matter how close you live, if you haven't spoken to the people, you're just a stranger. It will be fun if the number of people you know increases through neighborhood jichikai activities, and in case of emergency, we can help each other.”
(Mr. K, a man in his 30s living in Iwatsuki Ward)

Jichikai association activities are necessary these days!

“After participating in the activities, I learned for the first time that the neighborhood jichikai holds many activities that enable us to live safely and with peace of mind. Also, through the activities, not only me but also my children have expanded their circle of friends. I think that it is a valuable opportunity to interact with many people these days. You may have a bad image of the neighborhood jichikai's activities, but I think there are some activities that you do not know, so I would like you to participate in an event by all means.”
(Ms I, a woman in her 40s living in Sakura Ward)

What does a jichikai do?

We carry out the following:

- traffic accident prevention activities
- crime prevention patrols to protect the town from crime
- disaster prevention activities to prepare for disasters such as earthquakes
- cleaning of garbage collection areas
- cleaning of roads and parks
- environmental beautification activities such as flower planting
- recreational activities to deepen local exchanges and friendships.

Many of our lifestyle are supported by various activities of the organized by the neighborhood jichikai.

A lot of fun! Festivals and recreational activities!

Being prepared is important! Disaster prevention activities

It feels good if the town is clean! Environmental beautification activities

In addition, your neighborhood jichikai is working with various local organizations.

Support your community and help to keep it safe!

~Lend your community a hand! ~

Join your neighborhood
jichikai (residents association)!

In recent years, the number of disasters caused by
earthquakes and heavy rains has increased, and the
importance of supporting each other in the community
is being reviewed. When a disaster strikes, the people in
your community are the most reliable. If you have a lot
of acquaintances in your community, that alone will
alleviate your anxiety and support each other. Joining
your neighborhood jichikai is the first step in building
ties with the community.
